👤 Professional Summary

Ruby on Rails Developer with over 7 years of experience in designing, developing, and maintaining scalable web applications across diverse domains. Proven expertise in backend development, API integration, and database management. Adept at collaborating in cross-functional teams as well as delivering independent contributions. Equipped with an AI-first mindset using CursorAI to enhance productivity and code quality. Highly motivated to take on new challenges that leverage technical proficiency while driving continuous professional growth.

📊 Skills

| Ruby On Rails | JavaScript | HTML5 | CSS3 | Git | PostgreSQL | Sidekiq | Restful API | Docker |

| AWS Solution Architect | Redis | Ruby | Python | CI/CD | Github Action | CursorAI |

💼 Experience

✦ MangoApps
Senior Software Engineer

Aug 2022 - Present   *Pune, Maharashtra*

(Product - **Integrated workplace collaboration and intranet solutions**)

- Contributed to key modules — Posts, Tasks, and Moderation — delivering new features, revamps, and performance enhancements.
- Developed scalable backend logic and optimized for speed, maintainability and platform performance.
- Partnered with Product Managers, Design Team, and QA Teams to drive on-time releases following agile methodologies and CI/CD practices.
- Improved system stability and user experience through refactoring, caching, and background job optimization.
- Recognized with "**Pat on the Back**" and "**Mango Super Squad Member**" awards for delivering high-impact features.
- Tech Stack: Ruby on Rails, MySQL, Redis, Sidekiq, JavaScript, React, IndexedDB, Docker, Git

✦ Blubirch
Software Engineer

Jun 2020 - Jul 2022   *Bangalore, Karnatka*

(Product- **Reverse supply chain solutions**)

- Collaborated with stakeholders to analyze requirements, design scalable features, and deliver high-quality Ruby on Rails applications.
- Trader platform [B4 Trader]– built modules for inventory management, order processing, and transaction workflows.
- Customer platform [B-maxx] – implemented user-facing features to enhance customer engagement and reverse logistics tracking.
- Ensured robust backend logic, optimized database queries, and maintained high performance across applications.
- Followed agile development practices and coordinated with cross-functional teams to ensure timely product releases.
- Tech Stack: Ruby on Rails, PostgreSQL, JS, jQuery, HTML, CSS, Git, JIRA

✦ Throughout Technologies

Software Engineer

May 2018 - Mar 2020   *Indore, Madhya Pradesh*

- Collaborated with clients to understand requirements and deliver customized Ruby on Rails solutions.
- Contributed to the development of multiple web applications across Finance, Education, and University management domains.
- Built and maintained RESTful APIs, implemented backend logic, and ensured code followed Rails conventions and best practices.
- Participated in testing, debugging, and deployment activities to ensure smooth project delivery.
- Gained foundational experience working in a service-based environment handling diverse business use cases and technologies.

📄 Recent Learning

- Attended Google AI Labs '25 for Advanced Multi Agent Systems
- Python, RAG
